

Work with us on a sustainable energy supply!

We are pioneers of renewable energy by conviction. ABO Wind develops and builds wind and solar farms as well as battery and hydrogen projects worldwide. For more than 25 years, ABO Wind's in-house specialist departments have been providing all steps of project development and implementation: from site assessment, planning, engineering, permitting and financing to construction, energy sales, grid connection, operational management and maintenance. A future worth living for future generations is our overarching goal. Renewables are our DNA.

Project Manager (m/f/d) Solar Construction

We are all passionate for renewables in general and solar in particular. Project Managers in our Solar Construction and Project Management Department provide technical support to our development colleagues already at a very early stage of the projects. Therefore, we know our projects from the very beginning and can develop and ensure the best possible concept.

Your passion

- Act as the single point of contact within Solar division as interface with the other departments of the company (finance, project development, grid connection, operation & maintenance)
- Responsibility for budgetary and detailed project cost calculations and timely execution of the projects
- Support to define specifications of electrical components like transformer station, inverter etc.
- Drafting scope of work, audit and appoint subcontractors
- Calculate construction cost for the realization of solar projects
- Providing support and guidance to the Site Managers
- Perform site visits to ensure contractual compliance and best quality of the works

Your qualification

- Degree in engineering or similar educational background mandatory
- Experience in the solar sector, preferably in relation to utility-scale, free-field plants
- Familiarity with EPC, solar PV performance and construction optimization
- Business fluent in English and German; Additional languages would be considered an asset
- You have a flexible attitude with the ability to travel to various site locations worldwide
- Leadership experience, negotiation skills, and a confident demeanor in an international context
- You are a team player but also used to work self-dependent
- You are familiar with using MS Office applications

- Commenting on the project design, providing valuable feedback in relation to actual conditions in construction sites and lessons learned

Don't match all the qualifications?

At ABO Wind, we're committed to creating a diverse, inclusive and authentic workplace. So if you're interested in a position, apply - even if your previous work experience doesn't match all the qualifications. You could be just the right candidate for this or any other position!

Severely disabled applicants will be given special consideration if they are equally qualified.

Good reasons for joining ABO Wind

We are a dynamic company and rely on appreciation and trust. The work at ABO Wind is not defined by hierarchies, but by competencies and the common will to successfully contribute to the global clean energy transition.
